EXPERIENCE

11 Years

As Project manager, Joe will manage all the business aspects of the preconstruction and construction phases, including budgeting, value engineering, contracts, scheduling, logistics, pricing and implementation. Joe will guide the team through choosing the most effective methods for each project.

Who is Joseph LoCoco

At the age of 19, Joe started his first business venture and has proven to be results driven in every avenue that he pursues. He graduated top of his class from Wentworth Institute of Technology with a degree in Architecture and a minor in Built Environment.

His career experience began as a kitchen and bathroom designer specializing in granite and marble countertops. From there, Joseph went on to design laboratory spaces and was a Project Manager for Healthcare and Life Sciences. He has worked on most of the major hospitals and pharmaceutical companies in the Boston area, including Mechanical System Coordination of those spaces.

Post corporate architecture, he followed his true passion: residential specialization in multi-million dollar luxury homes. His decade of experience in a variety of settings allows him the versatility and expertise to be able to work directly with you to bring your design/build dreams to fruition. His personalization, professionalism, creativity and attention to detail will soon have you realizing why everyone is going JOLOCO!
